

## BS11000/ISO44001 Foundation Course in Collaborative Business Relationships

### Foundation Course Overview

Formal Collaborative Working challenges many traditional business practices and attitudes **Successful implementation requires a thorough understanding of the principles, risks and opportunities implied by the process.**

The purpose of the Foundation Course – Grow through Collaborative Working - is to equip delegates with an understanding of the eight key steps referred to in BS11000/ISO44001 and their importance within the collaborative process.

This is an essential first step towards achieving the necessary cultural change in any business.

The course is designed in a modular format introducing common terminology in simple logical stages to provide a common vocabulary and working platform for businesses of all sizes in the modern supply chain.

### Content

The eight steps required to be covered by BS11000/ISO44001 are:

- Awareness
- Knowledge
- Internal Assessment
- Partner Selection
- Working Together
- Value Creation
- Staying Together
- Exit Strategy

The course also introduces collaborative behaviours, collaborative contracts, knowledge sharing, self-assessment and formal certification.

### Training Outcomes

The learning objectives are for delegates to gain

- Knowledge of the benefits and challenges of collaborative working.
- A clear understanding of the BS11000/ISO44001 standard and processes.
- Appreciation of the skills needed to collaborate successfully.
- An insight into behaviours within their own company that may contribute to or hinder collaborative working.
